

Victorian Place Name Abbreviations and Alternative Names

A Genealogy Research Aid

Kathleen M Fanning

Introduction

This list of abbreviations and place names is to help the family historian work out where their ancestors were born, married or died in Victoria Australia.

The abbreviations were mostly taken from the Pioneer Index for the state of Victoria in Australia. This index covers the period 1836-1888 but most abbreviations still apply to later times.

These are by no means all the abbreviations found in the Pioneer Index records but are about three thousand of the most commonly used abbreviations.

I have used the Pioneer Index to find place names but I have only looked at some original certificates. I have used the sort function on the Pioneer Index extensively and Google maps to help work out abbreviations. I have taken care to try and be as accurate as possible and if I have been unsure I have left out that abbreviation.

How to Use this PDF File

The pdf file is organized with the abbreviations in alphabetical order on the left hand side and place names on the right.

The pdf file can be searched through Edit and then Find.

If a place has more than one abbreviation the abbreviations are all listed in alphabetical order e.g. Abbotsford has five different abbreviations.

Often the same abbreviation was used for several places e.g. ALLA was used for Allan's Flat and also Allansford. If you look at where other family members lived this may help to narrow it down.

The majority of these place names still exist. Google maps are very useful in looking at locations and their proximity to each other.

Sometimes there are two places or more with the same name so I have indicated this in brackets next to the name for example there were e.g. Barker's Creek (2).

Most times whoever was recording the record abbreviated the place name to the first four letters. With longer names they sometimes took the first letter and the last three or four letters e.g. Essendon becomes EDON and

MALLOC is for Mordialloc. But there was no set method so there are many variations.

If the place name has two words like St Arnaud there are two variations one is ST AR and the other is STAR. Often they are split even for place names of one word and there is a space between the second and third letter, Dimboola is abbreviated as DI MB and also DIMB.

There were however often spelling errors in transcription. Some of the common errors are these letters being mixed up: N and M, E and A, N and W, N and U e.g. MAGA instead of NAGA for Nagambie. I suspect spelling errors in place names and surnames account for a lot of lost records.

Keep in mind that many places in the colonies were named after places in the home country. For example I discovered that Castlemaine was Castlemaine in Co Kerry Ireland not Castlemaine in Victoria.

I have included some overseas countries and place name abbreviations. The country is also listed.

The Pioneer Index covers the Gold Rushes in Victoria and many of the place names reflect this, for example, Scotchman's Lead, Peter's Diggings and Nuggetty Creek. Gold was discovered in 1851 in Victoria and resulted in a huge population increase and much movement from one gold field to the next. Don't be surprised to find your ancestors moving around a lot in this period.

Short names were not abbreviated and they are the actual names e.g. Sale or Moe.

If you do have the Pioneer Index on CD you can sort on every field which means you can sort by mother's name or place or registration number. You can also use a wildcard, type in the first four letters and then an asterisk for e.g. for Barkly BARK*

Many places had their names changed several times e.g. Pentridge was changed to Coburg to avoid the stigma of Pentridge Gaol, Rosedale replaced Blind Joe's Hut and Gravel Plains became Corryong. Name changes I have come across are included at the end of the file. Some of these came from the Gazetteer of Victoria included in the Pioneer Index Cd, others from reading on sites about particular places.

[Place names in Vic BDM Indexes](#) has some good hints on working out place names.

If all else fails it is possible to purchase online from [Births, Deaths and Marriages Victoria](#) an image of the original certificate for \$17.50. It only takes a few minutes. It is a good idea to save a copy to your hard drive as well as print a copy. This way you can go back and use zoom tools to study it.

If you have any questions, additions, corrections or feedback you can contact me by email at kathleenmfanning AT Hotmail DOT com.
